

SHARE members benefits

Network of researchers and organisations working in ionising radiation

Direct involvement in conferences and workshops organised by SHARE with the possibility of contributing papers, posters, topics and format of the meetings

Becoming a partner in various SHARE European projects

Involvement in the development of policy, standards and guidance documents

Discounts on workshop fees and other selected events

Nominating and voting for members to the SHARE Board

Opportunity to propose or join one or more Working Groups

Contributions to the SHARE newsletter including free advertising

Career opportunities for young researchers

Your institution's logo in the rolling banner on the SHARE home page and its inclusion in SHARE dissemination material

European Platform for Social Sciences and Humanities research relating to Ionising Radiation

Are you interested in social sciences and humanities in ionising radiation?

Would you like to join a growing network of European universities, research institutes and experts?

Become a member of the
SHARE platform

Open to individuals, institutions and organisations

<https://www.ssh-share.eu/>

Our mission

SHARE stimulates the integration of social sciences and humanities (SSH) in research, practice and policy related to ionizing radiation, including, for example: radiation protection, low dose risk, radioecology, emergency preparedness and response, dosimetry, medical applications, radioactive waste management, nuclear energy production, safety, NORM, site remediation etc.

To this end, SHARE structures and enhances dialogue at the European level and beyond, among the different stakeholders, fostering the sharing of knowledge and information among various disciplines working on aspects of ionizing radiation.

SHARE was established in July 2019 and has currently 24 members. The platform is managed by an administrative bureau and has a Steering Committee elected by the General Assembly. Working groups are organised around specific research topics and issues in both bottom-up and structured way.

RICOMET2020

The sixth RICOMET conference on Social Science and Humanities in Ionising Radiation Research takes place in Athens, Greece 1st to 3rd of September 2020.

This edition will give attention to societal aspects of nuclear waste management, radon air pollution, environmental remediation, naturally occurring radioactive material and upgrading the strategic research agenda in social science and humanities (SSH) in ionising radiation.
